Company Overview

Expeed Software is a federally certified 8(a) information technology service provider with centers of excellence in Data Science, Advanced Analytics, and custom Application Development. Based out of Columbus, Ohio, we have been helping clients unleash their data and automate their business processes using innovative software solutions since our founding in 2008. We provide value through our passion for emerging technologies, and laser-focused efforts on providing business value to every engagement undertaken.

Management & Leadership

Our management and leadership team has over 60 years of experience across the federal and commercial spaces, working with agencies and companies like NASA, ESA, Air Force, Navy, General Electric, IBM, and Infosys. We have led and managed long and complex software and data science projects for various clients. Our mission is to bring that experience to every solution developed for our customers. Our leadership team believes that our people are our number one asset, and that investing in their personal growth is an investment in the future success of our customers.

Differentiators

- We're not a job shop or staffing firm. We solve real-world problems.
- We value long-term strategic partnerships, to help you see the future faster.
- We don't just show up. We take ownership and guide you through the process.
- We ensure you're prepared to quickly respond to market changes and new customer demands.

Past Performance

Designed, developed and continue to manage a complete energy procurement, meter-integration energy tracker, carbon tracker and energy analytics platform.

Humana.

Provided services using big data and machine learning techniques to deliver analytics required to find target patient segments in certain comorbidity categories for specified procedures.

Designed and developed applications to manage the workflow involved in studying images such as X-Rays, MRIs. Also implemented a Natural Language Processing (NLP)-based engine to detect critical results.
